SUMMARY

Versatile professional and Information Security scholar with a unique blend of experience in Biomedical Engineering, Cybersecurity. Proven track record in managing complex technical maintenance for medical infrastructure and leading large-scale humanitarian operations. Expert in technical troubleshooting, network security, and project management, dedicated to leveraging technology for community resilience and operational excellence.

CORE COMPETENCIES

- **Information Security:** Network Security, Firewall Configuration, Static Routing Protocols, Cisco Packet Tracer.
- **Engineering & Technical:** Medical & Dental Equipment Maintenance, Technical Documentation, Infrastructure Planning.
- **Software Development:** Java, JavaFX, Database Schema Design, IntelliJ IDEA.
- **Leadership & Management:** Strategic Planning, Team Coordination (25+ volunteers), Emergency Response, Logistics.

PROFESSIONAL EXPERIENCE

Assistant Engineer | DentaTech

October 2025 – Present

- Spearhead technical maintenance and infrastructure planning for dental clinics, specializing in Panorama equipment and specialized medical tools.
- Draft comprehensive annual service contracts and technical documentation to ensure 100% operational uptime for medical facilities.
- Consult on engineering workflows to optimize equipment performance and patient safety protocols.

Founder & Manager | Kayan Relief Team

Dec 2024 – Sep 2025

- Established the administrative and operational framework for a humanitarian assistance organization, managing a field team of over 26 volunteers.
- Oversee emergency response logistics and resource distribution, ensuring efficient aid delivery to high-need areas.
- Direct organizational recruitment and volunteer training programs to maintain high standards of community service.

Assistant Engineer | Al-Zant Co. for Medical & Lab. Devices

Jun 2022 – Dec 2024

- Supported the maintenance and repair of advanced medical systems (e.g., Ultrasound, Echo), specializing in troubleshooting electronic components and assisting senior engineers with system diagnosis and preventive maintenance.

EDUCATION

Associate Degree in Information Security | University College of Applied Sciences (UCAS)

2025 – Present

- Relevant Coursework: Network Security, Advanced Java Programming, Cybersecurity Labs, Database Management.

Technical Diploma in Electrical Engineering | MOL

2023

- Specialized in the repair and maintenance of high-precision dental and medical equipment.

TECHNICAL PROJECTS

CloudCAS Library

- Developed a digital platform and automated Telegram bot to facilitate technical information sharing and academic resource accessibility.
- Designed the bot's command architecture and user interface to support community-driven knowledge exchange.

Accounting & Inventory System

- Engineered a functional accounting system using Java and JavaFX, incorporating a robust database schema for inventory management.
- Optimized data retrieval processes to enhance system performance and user experience.

Academic Researcher & Author

- Authored a group of books that manuscript exploring themes of community resilience and social experience.
- Conducted research on social dynamics and personal narratives to support community-building initiatives.

CERTIFICATIONS & SKILLS

- Technical Tools: Cisco Packet Tracer, IntelliJ IDEA, Microsoft Project.
- Languages: Arabic (Native), English (Professional Working Proficiency).
- Key Skills: Vulnerability Assessment, System Maintenance, Technical Writing, Public Speaking.
